# Introductions

# Keven Truhler, CPA - Digital

- Principal with the Digital Group of CLA.
- Keven has been with CLA for fifteen years providing audit, accounting, and software services with a wide variety of non-profit and government clients.
- Today, Keven specializes in implementation of cloud-based accounting solutions and has implemented financial systems on more than 300 non-profit and for-profit organizations.

# Javier Young, CISSP - Cybersecurity

- Javier is a Principal within the Cybersecurity Services Group at CLA and has over 14 years in the cybersecurity.
- Javier leads a team of technology and industry specialists providing IT audits and security assessments for clients in a wide range of industries and diverse operating environments.
- Prior to joining CLA, Javier spent ten years supporting the Department of Defense as well as a financial services company in the fields of insider threat, incident response, fraud, waste and abuse, analytics, and systems engineering.
- Since joining CLA, he has spent the majority of his time providing IT Security, Risk, and Consulting services.

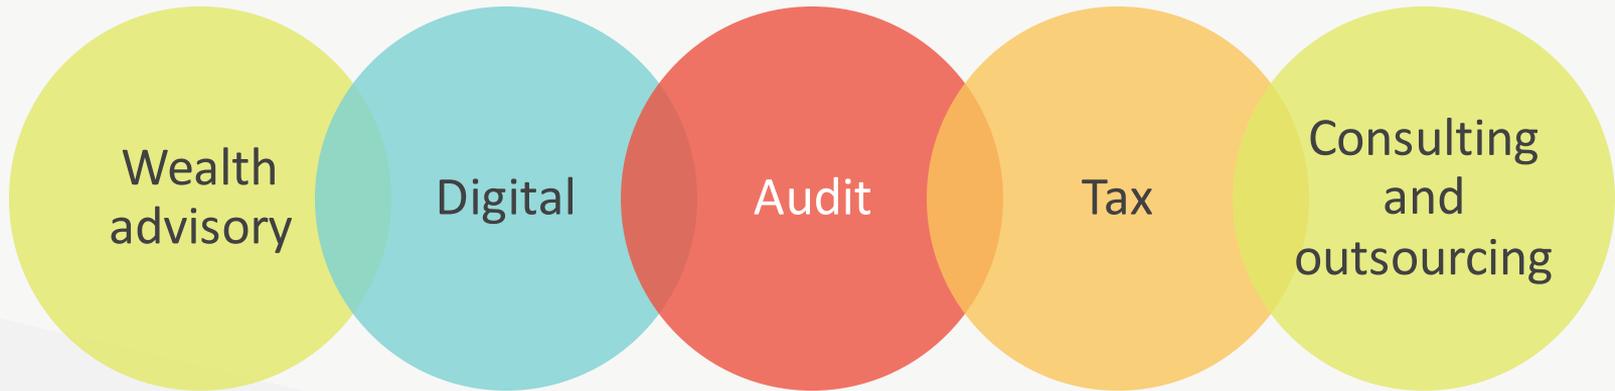

## OUR PURPOSE

CLA exists to create opportunities  
for our clients, our people,  
and our communities.

# Helping You is Our Passion.

# Find support at *every* turn

Benefit from guidance on  
all aspects of your business.

# Top Finance Department Trends – 2023

The cloud  
is here to stay

The labor crunch  
is accelerating the  
use of automation  
in accounting

Accounting artificial  
intelligence  
investment will  
continue to grow

Outsourcing accounting  
is becoming more common

Analytics, action, and  
storytelling will continue to  
converge with data automation

<https://the-cfo.io/2023/03/09/key-trends-that-will-reshape-finance-in-2023/> - The CFO (the-cfo.io)

# Why Cloud Automation? Address These Issues

## The business experiences

Overworked staff who are compensating for technology that is not fully utilized or integrated

Increased costs and resource requirements associated with maintaining on-premise hardware and software and/or manual paper-based processes

Reduced productivity and user satisfaction

Lack of real-time access and visibility to financial data

Challenges integrating multiple locations, business units, or currencies due to growth and expansion

## The CFO experiences

Limited visibility to accurately and timely manage cash and budget

Increased manual effort to access critical financial information and reports

Increased exposure to a breakdown in controls

Reduced ability to provide strategic vision while bogged down in manual accounting tasks

## The user experiences

Increased usage of spreadsheets with limited functionality

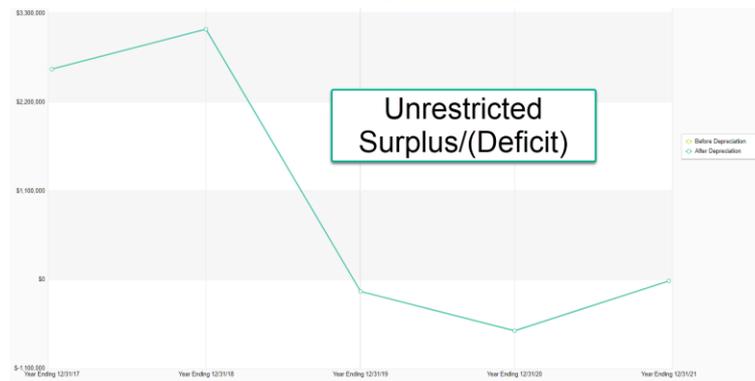

Limited ability to access financial data anywhere, anytime, from any device

Limited integration between systems, causing manual data re-entry

# What can be automated with cloud software?

- Multi-location, entity, and currency
- Track multiple fiscal years in one database (org, grant, calendar)
- Track multi-books (GAAP, Encumbrances)
- Built in Approval workflows
  - Purchasing and Spend Management
  - AP bill coding and payment approval (AI)
- Bank Feeds for continuous reconciliations
  - “Receipt Burning” with credit card trx’s
- Automating Grant Billing on reimbursements
- Journal Entry/Allocation Automation
  - Release from restrictions
  - Functional Expenses; payroll allocations
  - Shared revenue/expenses for multi-sites
  - Revenue Recognition Management (ASC 606)
  - GL Outlier Detection (AI)

▼ Collaborative Compliance Decisions

**Karla Grace**

Based on the consolidated view we've seen today, we need to address drop in usage of the community center which consumes the same facility costs as when it was at full capacity. Relocating to the west near the clinic seems like a better location to serve those in need.

# RPA (what it is)

- Automation tool (bot): a software (think super macro)
- Intended to automate
  - Repetitive, and manual business tasks or process
  - Tasks with high error rates
- Without changing the process or the system
- Built on rules or “if, then” statements that tell a program (bot) what to do under certain conditions

# RPA: What it is not

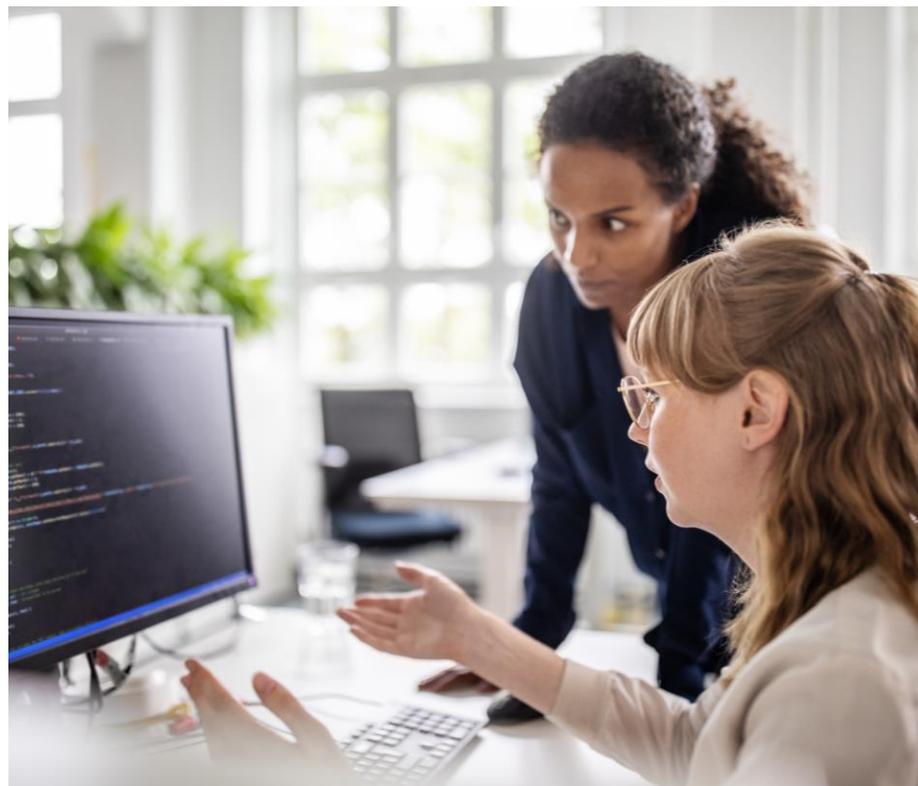

- A walking, talking robot
- Physical machine processing paper or materials
- Artificial intelligence
  - Voice recognition, etc...

# Advantages

- Reliable and more consistent
- Work 7 days per week, 24 hours per day
- A single can handle multiple processes, enabling multi-use and variability
- Because of 100% accuracy, there is less need for QC and review
  - QC and review is for exceptions

# Applications

Management of fund raising campaigns

Outreach campaigns

Compliance tracking

# Machine Learning – A definition

- Machine learning deals with computer programs that learn from experience for purposes of predicting, modeling, sensing
- You tell it what to do or provide data/information to learn from
- Examples:
  - Predicting what movie I would like to watch
  - Predicting future medical event
  - Predicting which drivers are more likely to cause accidents

# RPA v. AI

	<b>RPA</b>	<b>Intelligent Automation</b>
<b>Tasks it can automate</b>	Routine: Methodical, repetitive, rules based	Non-Routine: Requiring a thoughtful consideration
<b>Able to</b>	Follow instructions	Come to conclusions
<b>Application</b>	Broad: can automate any suitable process	Narrow: Targeted to deliver insights
<b>Market</b>	Maturing	Emerging
<b>Cost/Implementation</b>	Lower/Weeks	Higher/Months

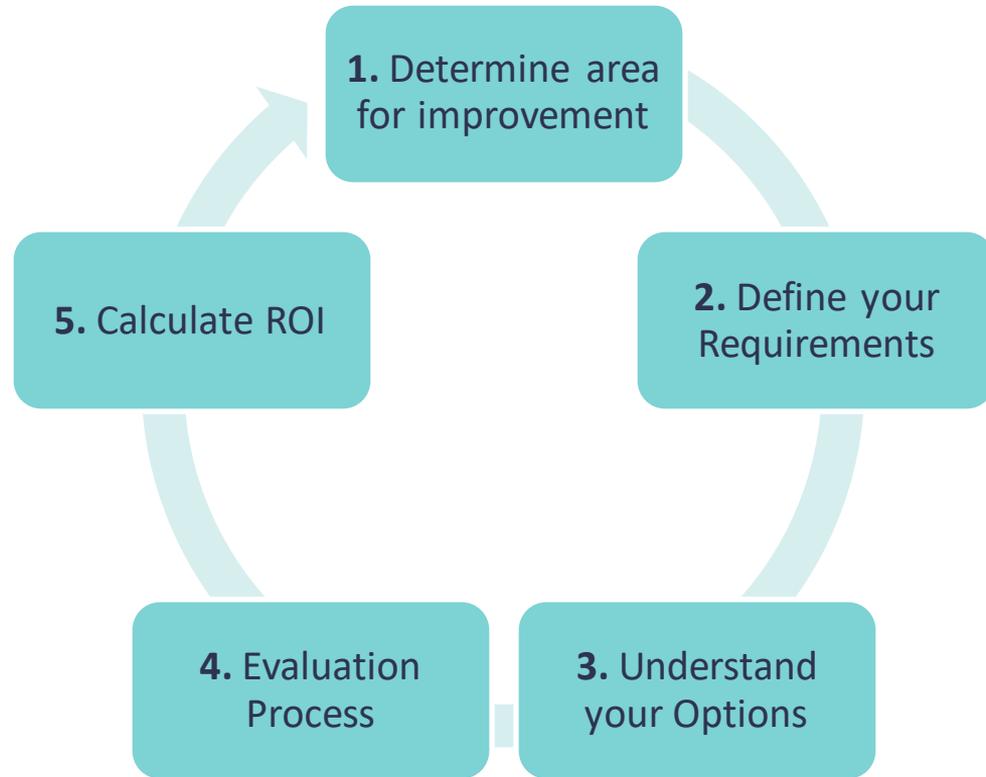

# Scan the QR Code To Answer

Where are you on you on your digital journey?

- A. Haven't even started
- B. We are well underway
- C. We're getting there
- D. What digital journey

# Roadmap Planning – Continual Improvement

*We'll get you there.*

CPAs | CONSULTANTS | WEALTH ADVISORS

# Strengthen and Streamline Your Month-End Close

Automation, internal controls, and value-added analysis

# Month-End Close

*Definition:* The month-end close is the collection of financial accounting information, review, and reconciliation of records each month. This is a reporting requirement for some companies, and **helps businesses keep accurate records throughout the year.** The most important closing period comes at the end of the financial year.

# Month-End Close: Raise of Hands

On *what day* are  
your financials closed each month?

1. 5 days after month end
2. 10 days after month end
3. 15 days after month end
4. We are lucky to close  
at all the following month

# Month-End Close

*How often* do you reconcile balance sheet accounts?

1. Monthly
2. Quarterly
3. Yearly
4. Depends

# Month-End Close

## Why reconcile balance sheet accounts monthly?

- Ability to identify miscoded transactions
- Collection issues on receivables
- Fraud noted when doing a bank reconciliation
- Incorrect deposits made for benefits (ex 403b/401k)
- Missed payment on loans
- Over/Underspending on grants
- Double recording of revenue (AR + deposit for same funds)

# Month-End Close: Use of Estimates

What are some common areas to use estimates or delayed periods for month-end close?

- Investment mark-to-market
- Accruals for recurring expenses (utilities, etc.)
- Credit cards (sometimes !?!)
- Others?

# Technology and Automation

# Technology and Automation

1. A/P and payroll

2. System integration

3. Report access

# 1. A/P and Credit Cards

#1 thing we hear  
holding up month-end  
close in nonprofits?

*Accounts payable*  
(coding, approvals)

*credit cards*  
(receipts, coding, approvals)

*Particularly important (and cumbersome)  
with cost reimbursement grants*

How can you add automation and  
remove this month-end delay?

- Online bill pay platforms
- Expense management platforms
- Accountability mechanisms

## 2. System Integration

Time-saving system integrations we like

### **Bill pay**

(integrates to book journal entries)

### **Month-end close software**

(integrates to pull balances; house reconciliations)

### **Payroll with allocations**

(some full integrations; others better upload/download)

### **Bank feeds**

#### **Fundraising systems**

(similar to payroll; sometimes full integrations are great; other times an efficient upload/download makes more sense)

#### **Financial report generation**

(makes your reports look amazing)

### 3. Report Access

By granting more people in your organization read-only access to (appropriate) financial information, you can empower them to:

- Review financial information throughout the month and spot errors/coding changes mid-month vs. at month-end
- Allow budget owners to see budget v. actual (particularly on the expense side)
- Gain a better understanding of the financials of the organization

# Scan the QR Code To Answer

What is the biggest ongoing challenge for your accounting team?

- A. The IRS
- B. GAAP Standards
- C. We don't have an accounting team
- D. Cybersecurity and data protection
- E. Other

# Value-Added Analysis

What to do with all that extra time?

# Raise of Hands ....

When your books are closed, what are you able to do on a recurring basis each month today?

	<b>1</b>	<b>2</b>	<b>3</b>
Review results and bring questions/observations to the team to discuss	✓	✓	✓
Financials produced are standard packet (SOA, SOFP)	✓	✓	✓
Analysis of key highlights at a summary and/or line-item level		✓	✓
Dashboard or graphic representation of the financials		✓	✓
Updated forecast showing where the organization is likely to end the year			✓
Interactive tools to allow budget owners and/or governance to analyze performance to-date			✓

*We'll get you there.*

CPAs | CONSULTANTS | WEALTH ADVISORS

# 6 Questions you Should ask your Organizations Related to Cybersecurity!

# 1. Do we have a Formal Information Security Program in Place?

*We'll get you there.*

CPAs | CONSULTANTS | WEALTHADVISORS

# The Information Security Program should Establish:

The  
importance of  
information

The need to  
protect  
information

Roles and  
responsibilities

Enforcement  
of policies

# Policies, Standards, and Procedures

## *Network and System Policies*

- Logging and monitoring of security events
- Remote access
- Wireless networking
- Patch management
- Firewall management
- Antivirus management
- Intrusion Detection/Prevention

## *The Board should review (annually)*

- Information Security Program and Status
- IT and Information Security Policies
- Security Breaches or Attempted Breaches
- IT Strategic Plan
- Information Security Risk Assessment
- Business Continuity Plan and Testing Results
- Incident Response Plan
- Results from Vendor Management Reviews
- Insurance Coverage for Cybersecurity

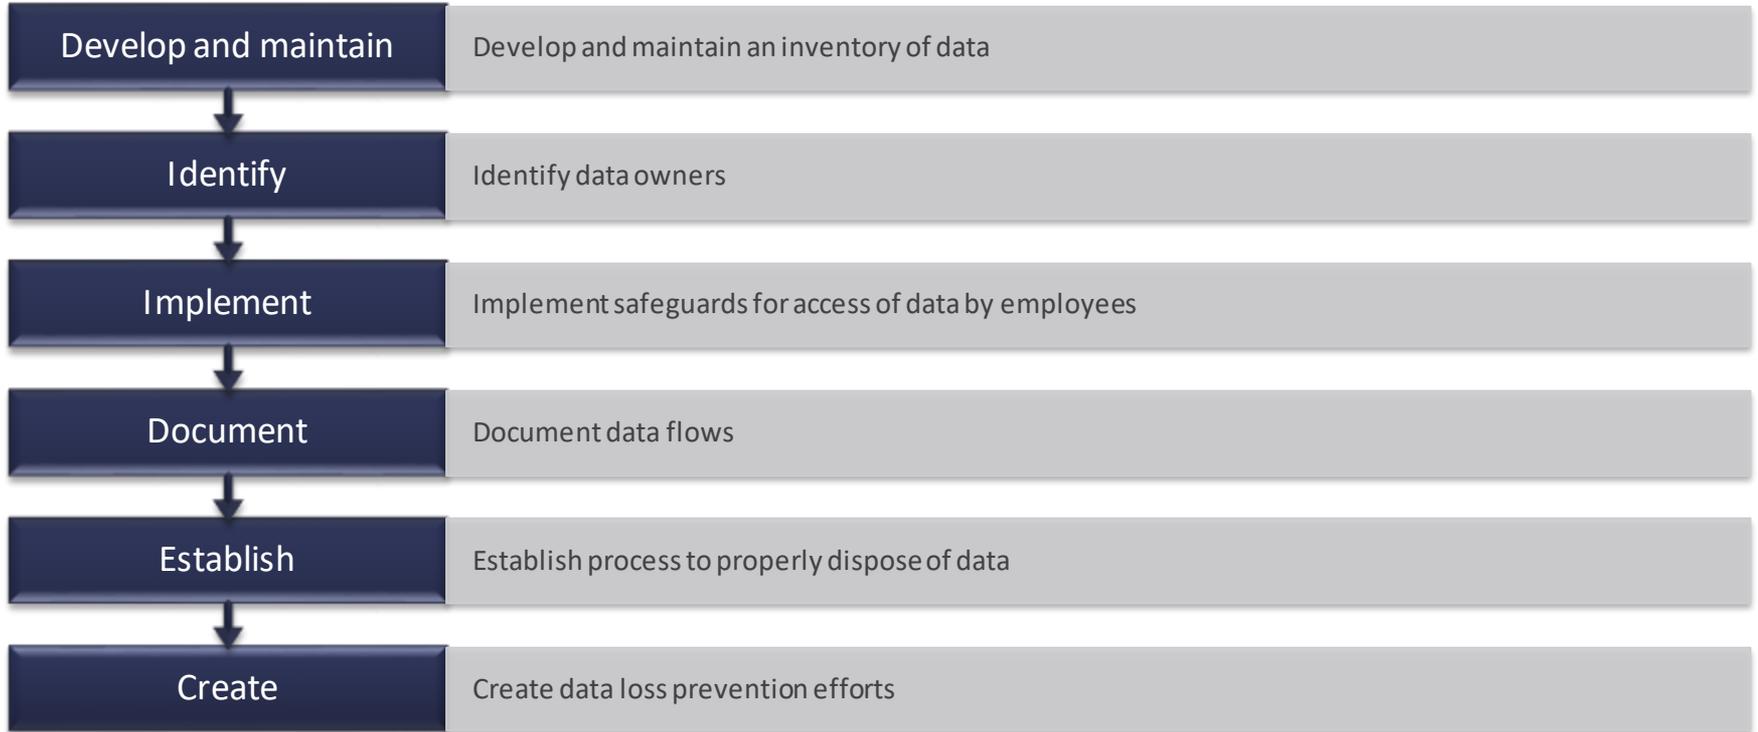

## 2. What Data is Important to our Organization?

*We'll get you there.*

CPAs | CONSULTANTS | WEALTHADVISORS

# Data Protection

# Data Classification

Organizations should strive to have at least three levels of data classifications.

Public

Internal Use

Confidential

Controls should be implemented for each level of classification regarding data handling.

### 3. Are Employees Receiving Security Awareness Training?

*We'll get you there.*

CPAs | CONSULTANTS | WEALTHADVISORS

# Consistent Security Awareness Training is Essential

Password strength and confidentiality

Document destruction

Locking and Logging Off Computers

Social Engineering and Phishing

Data Loss Risks (Removable Media, Email, Third-Party Storage Sites, Social Media Posts)

Acceptable Use

## 4. Are we Ready for a Cyber Attack?

*We'll get you there.*

CPAs | CONSULTANTS | WEALTHADVISORS

# Are we Ready?

What are we doing to prevent cyber attacks?

What will we do if we are attacked?

Have we been  
attacked/compromised in recent  
history?

Did this result in data loss?

## 5. What Could an Attacker do in our Environment?

*We'll get you there.*

CPAs | CONSULTANTS | WEALTHADVISORS

# Penetration Testing Uncovers Risks and...

---

Reveals system vulnerabilities and misconfigurations that are beyond the scope of a vulnerability scanner

---

Evaluates the effectiveness of security awareness training and employees' ability to detect and report social engineering attacks (email phishing, pretext phone calls)

---

Allows organizations to receive a “fresh look” at the network from an outside perspective that is free from internal bias

---

Evaluates the effectiveness of security event logging controls and mechanisms to detect/prevent suspicious activities

---

\*Penetration testing of information systems should be performed at least annually or when major changes occur.

# Scan the QR Code To Answer

How many of you have had a penetration test performed at your organization?

- A. We have had one in the past.
- B. We have never considered having one.
- C. What's that?
- D. We have this done annually.

## 6. How do we Assess Third-Party Risks?

*We'll get you there.*

CPAs | CONSULTANTS | WEALTHADVISORS

# Vendor Due Diligence

How do we select and onboard vendors?

Is there an assessment of risk associated with the onboarding of vendors?

Do vendors adhere to our policies, standards, and procedures?

Do we review assessments/audits of our vendors?

# Thank you!
